

"Experts Agree: Next Major Medical Advance Is An Agent To Boost The Immune System."

In November, 1998, that scientific breakthrough became commercially available for the first time in the U.S. Requiring millions of dollars of development by two major Fortune 500 corporations over a decade, it has been proven in numerous double-blind, placebo-controlled tests (including Harvard Medical School & U.S. Army). Formulated with natural antibodies and immune co-factors, it maintains health by *balancing and supporting weakened immune systems*.

Think About The HUGE Market Potential Of This New Technology!

Even more important, as you read this Confidential Special Report carefully consider,

"How You Can Profit With This Fast Growth Company Marketing *The Next Great Medical Advance ... To Fight Immune Deficiency!*"

You see, you are among the first to hear about this incredible product. You are on the edge of technology, the leading edge of the medical and health business for the next millennium. Here are specific areas to consider in this Special Report:

- *Ground floor* opportunity
- Tremendous income potential
- Worldwide distribution rights
- Financial powerhouse company, primed for growth
- *Solid, proven step-by-easy step marketing system*
- *Leading-edge* biotech company
- True medical *breakthrough*
- Product universally needed
- Product universally *desired*
- Product unavailable elsewhere
- Solid *independent testing* by reputable institutions

Before jumping to any conclusions, or getting too excited, it's prudent to consider some of the facts. This Confidential Report will cover in detail:

- 1) **The Medical Advances Leading To This Breakthrough**
- 2) **The Intense Development And Testing**
- 3) **How This Patented Process Works**
- 4) **An Overview Of The Distribution Process**
- 5) **Other References And Resources**
- 6) **How You Can Profit**

Section 1: The Medical Advances Leading To This Breakthrough

1) For thousands of years, disease was thought to be caused by evil spirits. Since 1674 the microscope had revealed tiny organisms in our water, but not until the 1820's was the first water filtration plant built (in London). Through the 1800's, the medical community scoffed at many things we consider basic to good health today, such as washing hands before eating (or even before surgery!) Even today, much of the world suffers with unclean water, and avoidable epidemics like cholera and typhoid continue.

2) In the 1860's Pasteur and Koch began to demonstrate infectious agents multiply within the body, and that specific bacillus caused specific diseases. Microbiology, immunology, modern concepts of sanitation and hygiene and most modern health practices

we consider absolutely basic were considered a luxurious oddity in the hospitals of the last century. Other medical breakthroughs of the 1800's include the first surgery performed with anesthesia in the 1840's and the discovery of Xrays in 1895.

3) So little was understood about disease, that in the great influenza epidemic of the early 1900's doctors had patients walk around with *handkerchiefs* over their mouth and nose for protection. Flu became a "second front" during the war, and almost as many of our WWI soldiers died on the crowded ships taking them to Europe, as in the trenches! Today we know viruses are small enough to pass through any woven fabric, but it was decades before viruses were revealed by electron microscopes.

4) The link between vitamins and health was only confirmed this century, and processed vitamins replaced drug elixers of the 1800's. Penicillin was discovered in the 1920's, but it wasn't until World War II that antibiotics became commonplace. Science struggled to understand the role of the immune system in healing our bodies.

5) By the 1980's antibiotics had been so overused that "superbugs" began mutating, pathogens unaffected by even our strongest drugs. Today, less than 20 years after the first diagnosed AIDS case, this runaway killer has made us all aware of the importance of our little-understood immune system, and the limitations of medical science.

6) In 1998 science successfully cloned a sheep named Dolly, over 40 years after the discovery of DNA as the building block of all cells (1953). **Yet science as a whole has remained baffled by the most basic building blocks of our own immune system - such as Antibodies, T-Cells, and Immune Co-Factors - and has struggled to understand how the body works to heal itself!**

Here is the substance what science does know:

- Only the human immune system can resist disease, cure the body and promote healing.
- Its millions of cells defend against invaders, reduce pain and inflammation, repair cells and slow aging.
- As society grows our immune systems are under increasing attack from increased contact with diseases strange to our system, and the mutations known as "superbugs" that are resistant to known antibiotics, as well as increased environmental toxins and pollutants.
- ***The next great medical breakthrough we most desperately need is a product to support and strengthen the immune system.***

Section 2: The Intense Development And Testing

Now, this would all tie together very neatly if it led *directly* to a medical breakthrough. But this isn't some fairy tale. Real medical research actually combines good, solid science, *mega* research dollars and a lot of luck. Not long after the first "superbugs" and AIDS cases were diagnosed, two major U.S. corporations took a most unusual step. They began joint ventures creating a private enterprise research group, to discover new approaches in human and animal health.

The first company was E. I. Dupont de Nemours and Company, one of the oldest and certainly one of the largest companies in America. Dupont alone is a powerhouse of research and development. The second was the major food products company, ConAgra. Together they created Dupont/ConAgra Vision, or **DCV Inc.**, to jointly develop these new of health and nutrition technologies. **DCV Inc.** became independent in 1997, and today is a leader in environmentally-sound human and animal nutritional products. **DCV Inc.** is:

- *the largest* North American producer of oat and dietary fibers used in food,
- one of the largest producers of potassium and sodium benzoate and the mold retardant sodium propionate, and
- *second largest worldwide producer* of choline chloride, an essential B vitamin,
- *the largest* manufacturer of chitosan (the fat blocker),

- and **DCV Inc.** excels with leading products in numerous nutritional and health areas.

All of that is grand by itself, and if you were looking to invest in a biotechnology company, **DCV Inc.** would be high on the list. However, the crowning achievement, the **medical breakthrough** and the product which is the subject of this report, has only recently become available at all. That product is **Egcel™ ACF**.

Egcel™ ACF Supports & Strengthens The Human Immune System.

Extensive scientific collaboration was required to develop and independently test this new breakthrough supplement for the immune system. These scientists included:

Dr. Helen Greenblatt, PhD., Immunologist, VP Product Development, DCV Inc.

Orn Adalsteinsson, PhD., Vice President Research & Development, DCV Inc.

Dr. David Trentham, MD, PhD., Professor of Rheumatology, Harvard-Beth Israel Hospital; Associate Professor of Medicine, Harvard Medical School; President, International Society for Rheumatic Therapy.

H. Ralph Schumacher, MD, Chief, Arthritis Section, VA Medical Center, Philadelphia; Department of Medicine, University of Pennsylvania

Luther Brady, Jr., MD, American Cancer Society Professor of Clinical Oncology; Professor, Dept. of Radiation Oncology, Allegheny University of Health Sciences MCP, Hahnemann School of Medicine; Co-Director, Rectal Cancer Center, Allegheny University Hospitals, Hahnemann and MCP

David Brodie, PhD., President, Discovery Research Consultants

Dr. Michael W. Pariza, Director and Chair, Food Research Institute, University of Wisconsin, Madison

Richard E. Isaacson, Professor of Microbiology and Immunology, University of Illinois

Dr. John Rosenberger, Chair of Food Science Dept., University of Delaware.

Dr. Charles Benson, DVM, Veterinarian, University of Pennsylvania

And many, many other collaborations with The U.S. Army, New York Hospital, and international institutions in Scandinavia, India, and the Far East.

These respected scientists and many others spent years developing and testing systems to boost the human immune system *and fight immune deficiencies*. They finally discovered and patented the technology to inoculate laying hens with human pathogens . . . resulting in the hens creating human antibodies which are passed in a concentrated way to their eggs.

DCV Inc. successfully developed a multi-patented proprietary technology to scientifically create and formulate natural antibodies and immune co-factors to support the human immune system.

Modern processing technologies strip away beneficial agents in our food today. Part of their challenge was finding how to process eggs so antibodies and natural co-factors wouldn't be stripped away. Undeterred, the scientists continued until they succeeded, custom-developing a "flash-pasteurization" process that didn't affect the living antibodies and co-factors (just one of the over 100 patents to bring the product to market!). After many years of scientific research and clinical studies, and at a cost of multiple millions of dollars, the result was the patented **Egcel™ ACF** process and formula.

A Quick Word on Patents. . .

Anybody can patent almost any mix or "formula". . . a little of this, a little of that, and voila! A new miracle youth-restorer is created! What we're talking about here isn't some bathtub-mixed or garage-washtub discovery, this is real science.

Egcel™ ACF strengthens and supports the human immune system. Already there have been numerous positive tests and over 100 worldwide patents covering specific scientific processes. Just some of the extensive independent testing and patenting along the way has included:

- A method for passive immunization using avian antibodies
- **Anti-cholesterolemic egg, vaccine, and method for production and use**
- Methods of preventing, countering, or reducing NSAID (non-steroidal anti-inflammatory drug) gastrointestinal damage by administering milk or egg products from hyper-immunized animals
- **The inhibitory effect of nutrient drink on the serum cholesterol levels and total cholesterol** (this was one of the two extensive tests the U.S. Army chose to perform, including the longest test ever performed by the Army. . . over 6 months of intensive study with positive results)
- A double-blind study of the effects of hyperimmune egg protein on elevated cholesterol levels and cardiovascular risk
- **Hyperimmune egg in the collagen-induced arthritis model and anti-inflammatory assays** (Harvard Medical School has been studying the positive effect of Egcel™ ACF on rheumatoid and osteo-arthritis in double-blind, placebo-controlled studies)

This is only a handful of the dozens of intense trials this product has undergone. Egcel™ ACF is not just some super-energy shake or vitamin mix, or some hocus-pocus collection of ancient herbal mysticism. This is true science, with real research, testing, and a cutting-edge, life-altering breakthrough! A methodology to introduce human antibodies and immune co-factors into our immune system, to support our body's war on diseased and alien cells.

Section 3: How This Patented Process Works

We all have **antibodies**. . . they defend your body against pathogens, outside alien cells that invade your body as a result of contact with diseases, viruses, molds, bacteria, pollution, chemicals. . . you name it. You know these as colds, cancer, E coli, salmonella, etc. When your body has a mutant cell, antibodies attack it, too. As in cancer. Only sometimes your antibodies get tired or confused, and they start attacking normal cells. These inappropriate responses are called auto-immune responses, and it results in diseases like arthritis and fibro-myalgia. Some prominent medical experts even believe baffling "syndrome" diseases (as in "Gulf War Syndrome") may be an auto-immune response to some combination of pathogens. Sometimes your immune system just doesn't know the difference between the "good guy" cells and the "bad guys", as with strep. . . strep cells literally "mimic" heart tissue causing your immune system to attack your own heart!

Along with antibodies, you also produce cells and **immune co-factors**, chemical messengers that help modulate and direct your immune system. They "call in the troops" when your system is under attack, **rushing white blood cells and antibodies to the front when your system is attacked by bacteria, fungi, viruses, parasites, and other organisms that invade the body.**

Because Egcel™ ACF is formulated with natural antibodies and immune co-factors that support human health and wellness, Egcel™ ACF maintains optimum health by balancing and supporting the immune system. Studies indicate Egcel™ ACF may also help. . .

- **Maintain cardiovascular function and a healthy circulatory system**
- Maintain digestive system health
- **Modulate autoimmune responses**
- Maintain healthy, flexible joints

The natural antibodies and immune co-factors in the Egcel™ ACF formula are biologically-programmed to **help your immune system defend and eliminate dangerous bacteria, including E coli and salmonella.**

The **Egcel™ ACF** formula is in "a class by itself, a **scientific breakthrough comparable to the discovery of vitamins, vaccines, and antibiotics**, which today are all accepted as having ushered in new eras of health and wellness."

The first product produced with the **Egcel™ ACF** formula is "**BioChoice™ Immune Support**". A tasty shake, **BioChoice™** also includes 63 vitamins, minerals, amino acids and proteins, making it a complete food supplement product.

The Challenge. . .

There are lots of food supplement products out there. **DCV Inc.** was very concerned about ensuring consumers differentiated between **BioChoice™ with the Egcel™ ACF formula** and everybody else's gee-whiz drink mix. For that matter, if **BioChoice™** were distributed through traditional retail channels, the problem was even more serious. . . how to keep the dust off as it languished next to cheap "instant breakfast" products. How could **DCV Inc.** tell their powerful story to a needing and desiring marketplace?

Perhaps you've looked at different supplements with all sorts of wild claims. . . maybe you're even using some type of vitamin-mineral-herbal supplement on a daily basis. You may be asking, "What's so different about **BioChoice™**?" Here's a challenge. . . answer these two questions for yourself when comparing other products:

- 1) **What independent scientific laboratory testing has been performed on the specific product**, in it's specific formula, with placebos and double-blind testing? That will eliminate about 98% of the products out there. If they have any specific scientific product testing, what were the results?
- 2) **What quality controls are** in place to ensure what you're sold is what you actually get? Each batch of **BioChoice™** is individually tested, internally and independently, to ensure active, living human antibodies and immune co-factors are present, *in the specified amounts*. When you drink **BioChoice™**, **DCV Inc.** can even tell you the exact batch of eggs it originated from! You've just eliminated any remaining supplements. **BioChoice™ is the only choice.**

Section 4: An Overview Of The Distribution Process

Obviously, by this time **DCV Inc.** had an unconventional corporate culture that was ready, willing and able to think "outside the box". Not willing to let conventional wisdom dictate the distribution, the company conducted in-depth market research including numerous focus groups, surveys and field trials, to determine the best way to bring **BioChoice™** to market. They asked consumers how they would prefer to learn about this **incredible breakthrough product**.

Even they weren't ready for the results! Far and away the number one response from their consumer market was that people wanted to hear about **BioChoice™** from people they knew. . . not necessarily the "professionals" in their lives (their doctor or pharmacist), but from someone close to them. . . through "word of mouth"

By now, **DCV Inc.** realized that their need to "tell the **BioChoice™** story" and the marketplace's desire to "hear from a friend" dovetailed perfectly. So they made the obvious choice: **BioChoice™** would be distributed through people telling people. . . through networking. By classifying **BioChoice™** as a supplement, the product could be positively affecting people's lives a decade sooner than the traditional route of having it classified as a drug. From strictly a financial standpoint, the return on **DCV Inc's** investment (roi) of millions upon millions of dollars would happen light years faster using networking to effect distribution.

Network Distribution has been refined and developed over the last 50 years. Today, MBA-level courses teach network marketing, pioneered by Harvard professor Dr. Charles King and Network Marketing Expert Mark Yarnell. Calling on an incredibly successful network distribution veteran of 34 years, Ted Elias, **DCV Inc.** began an **extensive**

search for a company to market their breakthrough product, **BioChoice™**. The search was a rotten failure! Of thousands of network companies, less than 50 have been in business over 5 years. Most are overstocked with copycat products available in any grocery or drugstore: traditional cleaning products, makeup, and vitamins.

DCV Inc. was unable to find any company with integrity, financial stability and complementary products that could also give the appropriate focus a **true medical breakthrough** like **BioChoice™** required. So, **DCV Inc.**, with Ted Elias' expert guidance, created their own network distribution arm: **Legacy USA**. Finally, after years of development, all the pieces were in place to move **BioChoice™** to market.

The Incredible Pay Plan Summarized

Legacy USA developed its marketing and distribution chart with no preconceived notions. They considered every pay plan, determined to create an extremely generous commission plan for its "footsoldiers". . .the distributors.

Consequently, even though odd, two-legged "binary" marketing plans have been prevalent (which only give advantages to the parent company), **Legacy USA has no limitations on how "wide" a distributor can build.** The company created the industry's most advanced "**dynamic compression**" system to ensure that performing distributors move up quickly and are paid for their efforts.

The front end of the plan jumps from 5% to 9% through **six compressed levels.** An additional 5% **Leadership Bonus is paid on 5 generations.** Commissions and bonuses are paid **three times a month.** Best of all, a distributor needs **only \$205 per month to qualify for overrides,** compared to thousands in many other, less user-friendly plans.

Hardworking distributors who reach the top of the pay structure will also share in a **generous companywide bonus pool,** paid semi-annually. **Legacy USA's growth is so explosive, some have already reached the qualifying level for this outstanding bonus!**

Worldwide Expansion

It's not unusual to take years for a company to begin expanding beyond U.S. borders. Once again, **Legacy USA** is already beginning to develop their program for other markets. **Worldwide expansion has already begun** with Canada, Mexico, Hong Kong, Taiwan, Europe, Japan and many other countries on the list. Several are targeted for the next 12 months alone. **Legacy USA's** incredible in-house computerized proprietary tracking system has already been designed to incorporate distributors within one's organization from any country, using any currency, in a seamless fashion. This includes complete online auto-registrations, auto-orders, and auto-shipping worldwide.

If, like many, you aren't familiar enough with the network distribution business plan to fully comprehend what all this means, simply put, **Legacy USA has designed a plan to pay you the most money, with low ongoing qualifications** so you can easily qualify for your commissions and bonuses. You have **no restrictions on width** (how many you can personally sponsor - very important!), **or depth** (how many are in your total downline), how "evenly" you build (unlike "binary" systems where you often must grow "evenly" to qualify for commissions). . . and you have no restrictions on how much you can earn! **Legacy USA** built this structure to favor you, the independent distributor. Distributors involved in network distribution have always secretly known that, "the bigger your front line, the bigger your bottom line," although many companies create plans designed to build "depth", even to the point of discouraging width. For a more detailed description of the **Legacy USA compensation plan, use the fax-on-demand service found in the reference section** (1-918-222-7278, press 1 for the menu).

Many people consider networking like other businesses, where it's important to be in on the "ground floor". The way networking grows - geometrically - it can *never* outgrow itself. However, the concept of "ground floor" is still a consideration.

The Real Meaning Of "Ground Floor"

You are among the first to respond to the opportunity presented in this report. Remember, it was only in November, 1998 that distribution first began. You could easily be the first person in your entire city or region who is aware of this breakthrough product. This isn't "ground floor". . . this is sub-basement! Experts in the field of network marketing believe this company could be "**potentially the first \$10 billion dollar company in the history of the industry!**" Those who are the "early adapters" stand to profit handsomely. To put it bluntly, those who have the decisiveness to act, to strike while the iron is hot, stand to make a walking ton of money! **In fact, individuals are already making four to five figure incomes a month, just a couple of hundred days into the development of the marketing network!**

But you've probably heard all this before. From a hundred and one companies, in boring "open meetings" and ridiculous ads in opportunity magazines. **You shouldn't jump into this. . . you shouldn't wait, either.** That's no contradiction. Simply put, you should seriously consider doing **due diligence**, making a few **phone calls**, **gathering information** you need to **make an informed, business decision.**

If you conclude (as many in the medical community have) that "**this is the most incredible breakthrough in health and wellness of our time. . .**" well, you'd have to admit that walking away would be incredibly shortsighted. If you conclude, as many experts in the networking field have, "**this is the most incredible ground floor business opportunity imaginable**", with a financially solid company, a solid, proprietary product unavailable at any price elsewhere, and a comprehensive pay plan designed for financial independence. . . then you must admit **there can only be one reasonable response.**

But wait. **Don't rely on this report alone to make your decision!** Do your due diligence. Take advantage of the corresponding information so readily available.

Section 5: Other References And Resources

We are expanding nationwide at a rapid pace. However, we want only people seriously interested and satisfied that **this product is the most incredible breakthrough of our time, and the network pay plan the best in the industry.** We highly recommend before you decide to try the product or take part as a distributor, you research at least one of the following no obligation resources:

- **24-hour message** from network marketing industry expert and best-selling author, **professor Mark Yarnell, 1-800-825-4540**
- **24-hour message** by **Dr. Hellen Greenblatt, PhD.**, regarding the integrity of the product, **1-800-825-4541**
- **24-hour voice-on-demand** information line with overview on the company, products and compensation, **1-918-222-7278, press 2** for the menu
- **24-hour fax-on-demand**, with **complete compensation details**, product information, announcements, and other information, **1-918-222-7278, press 1** for the menu
- **Weekly Legacy USA live conference call**, Tuesday 10 p.m. E.S.T., then replayed 24-hours, **1-918-222-7278, press 2** then 1
- Or, visit **24-hours online** at **www.legacyusa.com** or **www.biochoice.net** for complete company information.

Section 6: How You Can Profit Now

Do your due diligence. Check it out. Satisfy yourself. Then determine to take your next step. Don't let procrastination or anything else keep you from taking action and getting involved. Basically, there are four options.

1) You Can Choose To Do Nothing At This Time. We respect this. Some wrestle more with business decisions than others. There are loads of business opportunities out there. Having a clinically-proven product, a financially-strong company, tremendous commitment to research, development and quality, and the most lucrative pay plan in the industry. . . these may or may not hold a lot of value for you. Perhaps this isn't your "cup of tea". Or perhaps you feel you just don't have the time. Whatever your reason, we accept your decision. Should you reconsider, we sincerely hope you contact us immediately. Please consider this: If not **Legacy USA** and **BioChoice™**, then what? If not now, when? The old truism is still true, **if you keep doing what you're doing, you'll keep getting what you've got.**

Even if you believe after all you've read that this isn't for you, perhaps you know someone else who could benefit, either from the health aspects of this product (new clinical studies are finding even more than covered in this report!), or from this excellent business. If your decision is to do nothing at this time, please, **pass this Special Report to someone whom it will help.**

2) You Can Begin Using BioChoice™ For Your Own Medical Benefit. This option brings immediate health benefits, and we certainly encourage you to try this incredible product for yourself, and your family's health. Simply let us know using the information form provided, and we'll arrange to have the product drop-shipped directly to you as you use it. This product will positively change your life!

3) You Can Become An Independent Distributor And Build Your Fortune In Biotechnology. With this option, you can have your cake and eat it, too! You can enjoy all the benefits of the great **BioChoice™** product, at wholesale cost, and generate excellent retail profits as you build your organization with our direct assistance. This is the **Action Plan for Success!** Because this is so new, we still have a few opportunities for **Founding Partners.** This exciting opportunity can cause your income to skyrocket immediately. Let us know if this is the option you are ready to run with. . . only if you recognize the value of this opportunity and the quality of this scientifically-verified product.

******* Decisiveness is key to success in any venture. We respect that quality in you. If, after using the extensive research resources given here, you feel ready to move. . . fast, you can **call the number at the end of this Report**, for a live consultation on your future in biotechnology. You can also use the online address given at the end.

4) You Can Choose To Learn More. We respect the need to make a quality decision, based on facts. That's why we've taken the time to create this Special Report, and our proven, turn-key TEAM Support System, loaded with the solid information and references you need. We encourage you to check the references given. We also have a low cost, corporate multimedia business information kit that includes a video with the presidents of **Legacy USA** and **DCV Inc.**, researchers and distributors, all speaking in detail about the product.

An audiotope is provided with comments from many of the actual scientists involved with the **BioChoice™** product. Detailed information on the product and compensation plan, as well as forms and other documentation are included, should you wish to order **BioChoice™ Immune Support** or become an independent distributor.

You'll even get a sample of the incredible **BioChoice™** product. . . you choose the flavor! Because of the high demand for this corporate multimedia business information kit with **FREE BioChoice™**, it's become necessary to request a modest refundable deposit of \$9 (+\$5 shipping & handling). The information it holds will change your life.

Customized "TEAM Support" Marketing Training System So You Can Grow Quickly

We'll even include special information on what has been called "**the most duplicatable, turn-key marketing System ever created for the networking industry.**" This unique *Systemized* approach will help you quickly bring in dozens of qualified, motivated customers and distributors. . . and **never do an "open meeting"**! This approach has been **developed over a 20-year period** by networking superstars and marketing experts. It works extraordinarily well, and it will work for you.

60 Day, No Risk, 100% No Questions Guarantee

Try out **BioChoice™** and review this multimedia kit for 60 days. *If you're not absolutely convinced* this is **the greatest medical and health breakthrough** of our time, that this remarkable product will positively alter millions of lives, and that this **ground floor opportunity will skyrocket your income**. . . then please, return it in reusable condition for a full, unconditional refund of the purchase price. The **FREE BioChoice™ sample** is yours to keep! Frankly, we only want participants who recognize how incredible this product and opportunity really are. . . based on solid, factual information. That's why we take the extra step to make this kit available.

If you're still not sure. . .

. . .even after you've checked it all out, consider for a moment **BioChoice™**, through **Legacy USA**, is poised to **dominate the market**, with **the first and only true supplement that balances and supports the human immune system**. Here's what this means for you, by becoming involved with this incredible product and its distribution now:

- Worldwide Market
- Explosive Growth Potential
- Superior Return on Investment
- Current Limited Participation
- Incredible Health Benefits
- Significant Projected Growth

Millionaires will be made by the distribution profits alone of this incredible technology!

One company alone, Legacy USA has worldwide distribution rights! Get all the details and learn how you can tap into this explosive market now! (You owe it to yourself to at least call the 24-Hour No Obligation recorded message from industry expert and best-selling author Mark Yarnell toll-free today, **1-800-825-4540**).

In Conclusion..

This Special Report has given you a massive head start on what many experts from the medical and business community are calling, "the greatest ground-floor opportunity of the next millennium. **Once the word is out on BioChoice™ and Legacy USA, a stampede will occur towards this product and opportunity. . . worldwide!**"

This isn't rocket science. Even the stock market recognizes this. If you could put together the money to invest in, say, Microsoft today, odds are you'd make a lot of money, as this giant continues to grow and introduce more, newer and better products.

It's proven that people can get into networking with a company ten or twenty years old and still make incredible incomes, as those companies grow from big to bigger.

What if you'd known how explosive Microsoft, PC's and the Internet would be back in the 1980's? Wouldn't you have done everything in your power to get a piece of the pie, and encourage everyone you knew to do the same? Of course you would! A few thousand in 1985 stock is worth millions today! **You could still make money with Microsoft stock today, . . . but not the fortune the ground floor opportunity would've meant.** In networking as in any other business. . .

Fortunes are made when companies go from small to big!

You are learning about this phenomenal opportunity while it's still small! **Legacy USA** only began distribution of **BioChoice™** in November, 1998. At most there are a few thousand distributors today. . . who will benefit from the growth as millions of distributors join in worldwide? ***Why Not You?!*** What you do with this information will determine how much benefit you will reap from the explosive growth that's already evident. We've included direct quotes from industry experts about this unique product and incredible opportunity. Read over them and then decide. Doing something now will forever change your tomorrows. Remember the definition of insanity is, "doing the same things over and over, thinking you'll get different results!"

What Medical, Scientific, and Industry Experts Have To Say

"It's the story that drives Wall Street and it's the story that drives our industry. With their years of intense research, patented **Egcel™ ACF** technology and tremendous pay plan, **Legacy USA, has the greatest story in the history of this business!**"

--Mark Yarnell

(Best-Selling Author ("Your First Year In Network Marketing", 34 weeks on NY Times Best-Selling List), First Inductee - Network Marketing Hall of Fame, Joint Creator of First College-Level Network Marketing Course, Network Marketing Millionaire)

"All the elements are in place for the average individual to make a fortune in this business. With over 20 years experience in the network distribution industry, 16 of them full-time with my sole income coming from my networking business, I have never felt more confident about this statement: **People who join our TEAM program now, and follow our step-by-easy-step System will become the next generation of millionaires in this fast-growth field.** People who fail to act will become spectators of a business phenomenon that could have given them wealth and freedom beyond their wildest imagination!"

--Gary M. Haiser

20 year Networking veteran, Former Corporate Board Member for MLMIA, Founder of Networking company, Recognized Industry Expert in Wall Street Journal, Success, Nations Business, Robb Report among other publications)

"I earned over four thousand dollars my first full month. **In a previous company,** where I earned over a half-million dollars, **it took me eighteen months to hit that monthly income!** This company's growth is so explosive, their product quality so high, their financial status so sound, and their pay plan so strong that I believe **more millionaires will result from this one company over the next few years, than any company in the history of networking.**"

--Greg Hartmann

Top distributor and Top Income Earner in two prior network marketing companies, Over 15,000 distributors in downline, Co-developer of Plug & Play Technology. Recognized as one of the most successful networking business trainers and builders in America

"My personal and professional experience with **BioChoice™** covers a period approaching three years. . .I am in the unique position of having spoken to essentially every **DCV Inc.** egg product user in America, during my work as head of the "Users Survey". I have conducted literally hundreds of personal interviews with **BioChoice™** users. These users report. . . **medical benefits from the product in disease states including arthritis, general energy level and gastrointestinal health.**"

--Manley A. Paulos, PhD
(VP Clinical Operations, Komodo Clinical Trials Management, Inc.)

"Perhaps the most interesting therapeutic effect of **BioChoice™** is its effect on arthritis. . .to reduce the pain and swelling associated with arthritis. . . the results were sufficiently positive to lead David Trentham, MD of the Beth Israel Deaconess Hospital in Boston to propose a larger controlled study which is currently underway.

"Another interesting use. . . is its **documented ability to treat hypercholesterolemia** . . .reports of **BioChoice's™** effect on cholesterol levels have come from both consumers and physicians, they are never as convincing as a double-blind placebo controlled clinical trial. The now-completed trial conducted by the United States Army at the Sergeants Major Academy of Fort Bliss (TX), is a landmark study. An egg product which can **reduce total cholesterol levels and cardiac risk factors (total cholesterol/HDL and LDL ratios)** is clearly unique."

--Marten L. Jeiven
(Jeiven Pharmaceutical Consulting, Inc.)

"I have been interested in the use of this product **for therapy and prevention of gastrointestinal disease** and have followed its development for many years. I believe that **BioChoice™** would be a very useful nutritional supplement in AIDS patients. One of the important problems in AIDS is the presence of enteric pathogens. Since **BioChoice™ contains antibodies to many of these pathogens it has the potential for acting as a suppressive therapy to reduce opportunistic infections in the intestinal tract.**"

--David A. Brodie, PhD
(President, Discovery Research Consultants)

"(Absence of side-effects is potentially) the most revolutionary or attractive element. . . in that **conventionally in the way that we have had to treat rheumatoid arthritis is by administering compounds that have varying degrees of toxicity**, ranging from major toxicity to not trivial toxicity, and, for example, even. . . these cox-two inhibitors such as psyllacoxsib can still cause major side effects. So I'm very attracted by the fact **that this is a nutritional enrichment technique that has no toxicity whatsoever**, assuming that the patient does not have a prior egg allergy history. So you (administer) it. If it works that's great, if it works without side effects, that's almost **unprecedented as a treatment paradigm**.

"The final aspect that I think is important to comprehend here is that by it's being a neutraceutical or nutritionally-based approach negates the bureaucratic nightmare of getting a new treatment approved by the FDA."

--Dr. David Trentham, MD, PhD.
Professor of Rheumatology, Harvard-Beth Israel Hospital; Associate
Professor of Medicine, Harvard Medical School; President, International
Society for Rheumatic Therapy. Directed 60 patient, double-blind placebo-
controlled Harvard trial of **BioChoice™**
